Education

DY Patil University - Ramrao Adik Institute of Technology Aug 2022 – May 2026
BTech in Information Technology, CGPA: 9.25/10 *Navi Mumbai, India*

Experience

Management Trainee – SAP Analyst Jul 2026 – Present
Deloitte *Mumbai, India*

- Supporting a client SAP Integrated Business Planning (IBP) implementation for **demand planning**, working on **sales forecasting** and **time series analysis** of historical demand data.
- Handling technical configuration and data tasks in **SAP GUI**, translating client planning requirements into system setups and validating planning outputs.

Research Intern Mar 2026 – Jun 2026
Indian Institute of Technology Bombay *Mumbai, India*

- Reviewed **20+** papers on **dual-modal Laser Ultrasound and Optoacoustic imaging** with weekly comparative reports, contributing to ongoing biomedical imaging research.
- Designed and launched web-based resources, including LISTEN lab's website using WordPress and Elementor, supporting the lab's digital presence and research visibility.

Machine Learning Intern Jan 2026 – Mar 2026
Indian Oil Corporation Limited *Mumbai, India*

- Engineered a scalable anomaly detection pipeline using **Isolation Forest** on **14M+ records**, enabling high-volume monitoring and reducing false positives by **30%**.
- Executed **feature engineering**, anomaly score analysis, and **threshold tuning** for optimized detection, validating detection consistency using **Silhouette scoring**.

Publications & Achievements

- *"Multi-Objective Autoencoder for Privacy-Preserving Representation Learning"* – IEEE Xplore conference proceedings, **IC3ET 2026**.
- *"Underwater Image Super-Resolution using GANs"* – *International Journal of Innovative Research and Technology*, Vol. 12, Issue 3, Aug 2025.
- Officially copyright of the project *Smart Attendance Generator*, an automated attendance system.
- Tech Contributor, *GirlScript Summer of Code 2025*; Open Source Developer, *HacktoberFest 2025* (6+ PRs).

Projects

Hallucination Detection in Multimodal LLMs / *PyTorch, BLIP* Github | Video

- Evaluated **600+** multimodal AI outputs using **BLIP**-based caption grounding and cosine similarity, developing a framework to detect **hallucinations** in vision-language models.

Underwater Image Super-Resolution / *PyTorch, GANs* Github

- Built a **GAN**-based deep learning model to enhance low-resolution underwater images, and achieving **PSNR** greater than **30 dB**.
- Integrated residual blocks into the generator architecture, resulting in **92%** visual similarity with reference images.

Blinkit Grocery Sales & Outlet Analysis / *MS Excel, Power BI* Github

- Cleaned and preprocessed **8000+** raw Blinkit records in **Excel**, handling missing values and standardizing categorical fields.
- Performed **EDA** and built interactive dashboards in **Power BI**, uncovering key sales insights such as a **15%** demand rise in Tier-1 cities.

Skills

Languages & Tools: Python, SQL, HTML, CSS, Git, VS Code, Colab, Kaggle
ML & Data: PyTorch, scikit-learn, Pandas, NumPy, Matplotlib, OpenPyXL, Power BI, MS Excel
Enterprise & Web: SAP IBP, SAP GUI, Flask, Streamlit, WordPress/Elementor

Certifications

Duke AI Product Management | AWS Cloud Architecting | IBM Machine Learning | Harvard CS50 AI
